## Studio Activity: Faces and Family

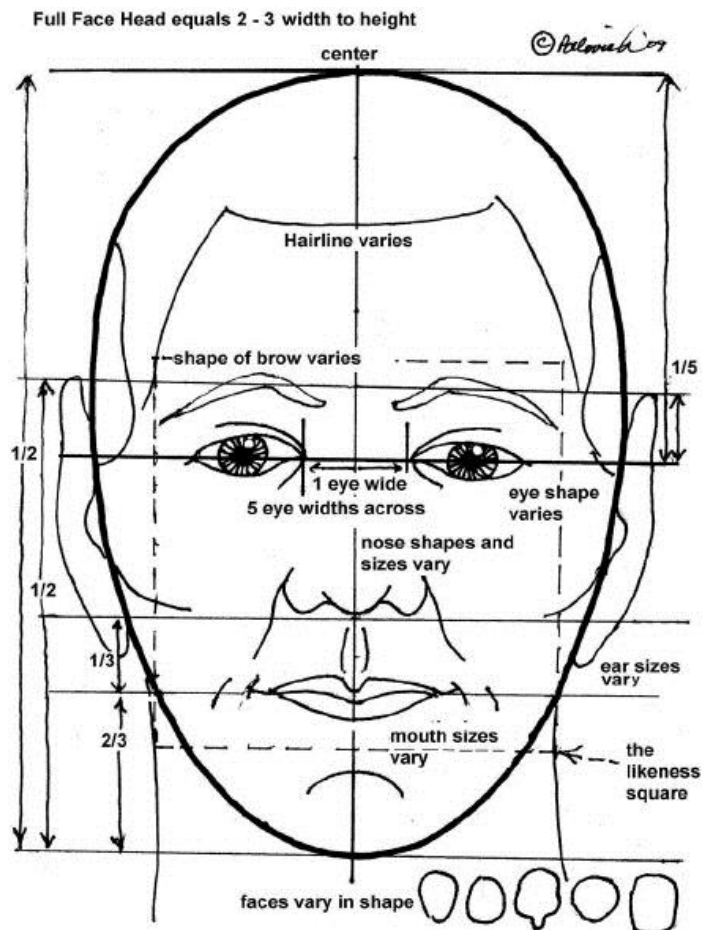

Drawing the human face takes patience

The face is so hard to draw because of there are so few lines. To help learn the correct proportions of the face and how to draw the features, we are featuring (see what I did there) them in the 1 x 1's this month.

### In your sketchbook:

**Copy the diagram to the right in your sketchbook. EVERYTHING.**

- Find images in magazines OR take images of yourself/family for each of these:
  - Eye
  - Nose
  - Mouth
  - Ear
  - Whole face- Profile view
  - Whole face- frontal view
  - Whole face-  $\frac{3}{4}$  view
- Cut them out/print them out and glue into sketchbook
- Use these images as your reference images for the "Feature" areas in the 1 x 1's

### Ideas for how to fill in the rest of the areas:

3 symbols of "Family" (according to you), 2 colors that best define your family or a family tradition, a pattern that a family member wears often, food your family makes at celebrations, sports you play as a family, what you are thankful for, caricatures of your family members, etc

Profile view

Frontal view

$\frac{3}{4}$  view
